COLLEGE NAME : Sri Venkateswara College Of Engineering

PROBLEM STATEMENT : Modern digital marketing requires hundreds of ad variations for A/B testing and multi-platform campaigns. However, companies can produce only a limited number of ads, creating a “Velocity Gap” in advertising.

PROBLEM STATEMENT

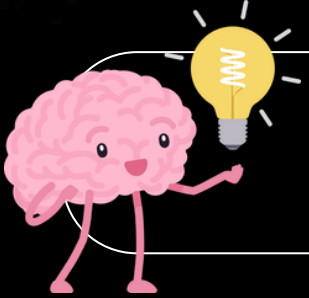

Digital marketing today depends heavily on ad experimentation and A/B testing.

However, companies face major challenges:

- Creating large numbers of ad variations is time-consuming
- Designers and marketers must manually create copy, visuals, and formats
- Existing tools generate only limited creatives
- Companies can test only 10–20% of possible ad variations

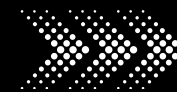

This creates a Marketing Velocity Gap — companies cannot produce ads fast enough to optimize campaigns.

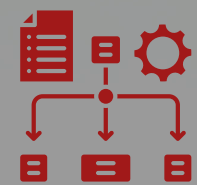

SOLUTION

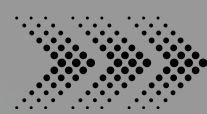

Existing
Solutions

Proposed
Solution

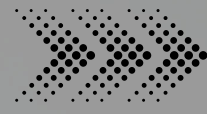

Manual workflow
with AI assistance

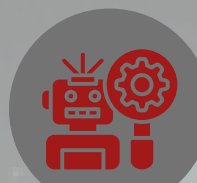

Fully autonomous AI-
driven workflow

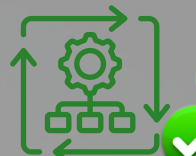

Tools generate
single ad assets

Generates complete
advertising campaigns

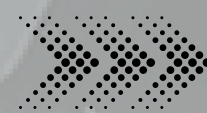

Partial
automation

End-to-end automation

Limited number of
ad variations

Hundreds of ad
variations instantly

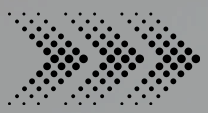

Tools work
independently

Multi-agent
orchestration system

Requires human
coordination

AI agents coordinate and
generate campaigns
automatically

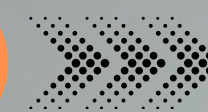

Low scalability due
to manual effort

Highly scalable parallel
ad generation

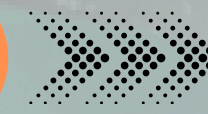

Slow ad production

High-speed ad
generation

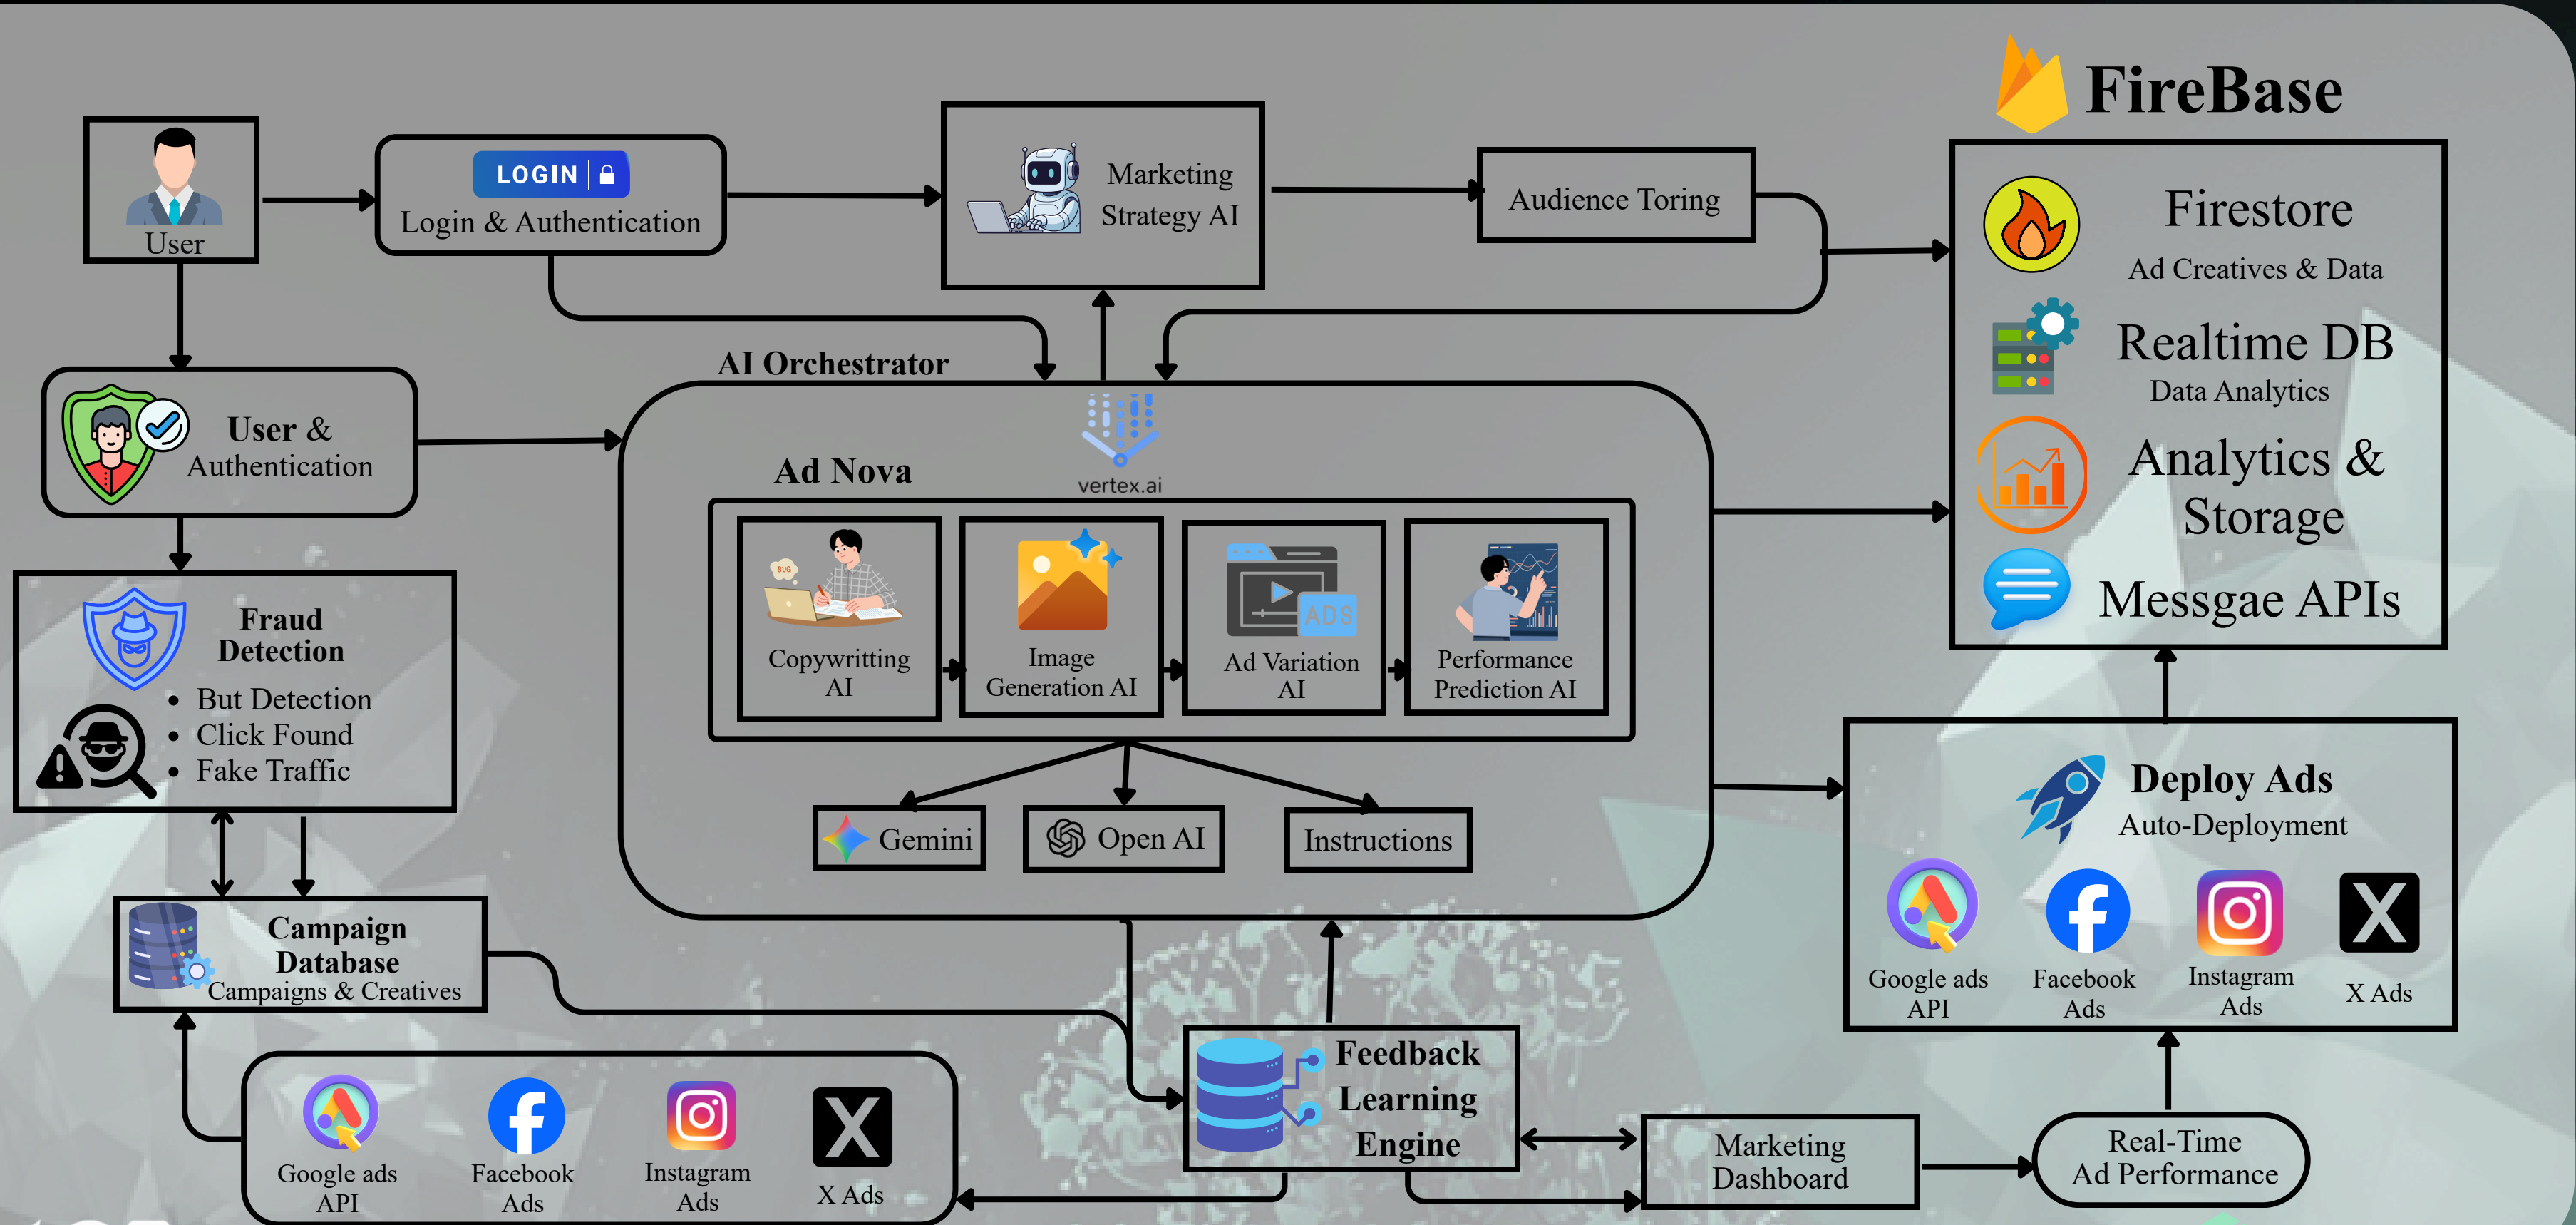

Limited A/B testing

Fully autonomous AI-
driven workflow

NOVELTY / USE CASE

Novelty of the Solution

- Agentic AI Advertising System that autonomously generates complete advertising campaigns from a single marketing brief.

Visual creatives

- Brand-consistent visuals
- AI-generated high-quality advertising images

Ad copy

- Enables 100+ ad variations automatically for effective A/B testing.

Multi-agent AI

Platform-specific formats

- Automatically optimized ads
- Resized creatives matching

Campaign variations

- Produces multi-platform ads simultaneously (social media, display ads).

Use Cases

Startups & Small Businesses

Quickly generate professional marketing creatives without hiring large marketing teams.

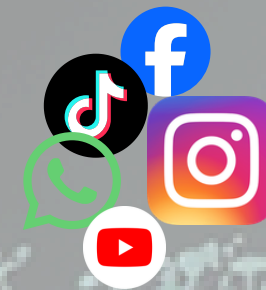

E-commerce Platforms

Automatically create product promotion ads, seasonal campaigns, and discount creative

Digital Marketing Agencies

Generate hundreds of ad variations for multiple clients simultaneously.

Social Media Marketing

Produce optimized creatives for different formats such as feeds, stories, and reels.

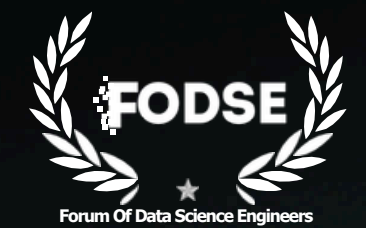

Campaign Optimization

Enable large-scale A/B testing to identify high-performing ads faster.

BUSINESS MODEL / TARGET MARKET

BUSINESS MODEL

STARTER

\$299/mo

500 ads/month • 3 brands • Static + Banner

SMBs & Freelancers

GROWTH ★ POPULAR

\$799/mo

2,000 ads/month • 10 brands • Static + Video
